Washington, D.C. 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13a-16 OR 15d-16 UNDER THE SECURITIES EXCHANGE ACT OF 1934

For the month of January 2016

Commission File Number 001-33098

Mizuho Financial Group, Inc.

(Translation of registrant's name into English)

5-5, Otemachi 1-chome Chiyoda-ku, Tokyo 100-8176 Japan

(Address of principal executive office)

ndicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F. Form 20-F ⊠ Form 40-F □
ndicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):
ndicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):
ndicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934. Yes □ No ⊠
f "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b):82

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Date: January 28, 2016

Mizuho Financial Group, Inc.

By: /s/ Junichi Shinbo

Name: Junichi Shinbo

Title: Managing Executive Officer / Group CFO

The following is the English translation of excerpt regarding the Basel Pillar 3 disclosures and the relevant information from our Japanese language disclosure material published in January 2016.

The Japanese regulatory disclosure requirements are fulfilled with the Basel Pillar 3 disclosures and Japanese GAAP is applied to the relevant financial information.

In this report, "we," "us," and "our" refer to Mizuho Financial Group, Inc. and, unless the context indicates otherwise, its consolidated subsidiaries. "Mizuho Financial Group" refers to Mizuho Financial Group, Inc.

Capital adequacy ratio highlights

The Basel Framework, based on the "International Convergence of Capital Measurement and Capital Standards: A Revised Framework" issued by the Basel Committee on Banking Supervision, requires the disclosure of capital adequacy information to ensure the enhanced effectiveness of market discipline. Our disclosure is made under the "Matters Separately Prescribed by the Commissioner of the Financial Services Agency Regarding Capital Adequacy Conditions, etc. pursuant to Article 19-2, Paragraph 1, Item 5, Subitem (d), etc. of the Ordinance for Enforcement of the Banking Law (Ministry of Finance Ordinance No. 10 of 1982)" (the FSA Notice No. 7 of 2014).

With respect to the calculation of capital adequacy ratio, we have applied the international standard and adopted (a) the advanced internal ratings-based approach as a method to calculate the amount of credit risk weighted assets and (b) the advanced measurement approach as a method to calculate the amount equivalent to the operational risk.

- 1. The above figures are calculated based on International standard applied on a consolidated basis under the FSA Notice No. 20.
- 2. In calculating the consolidated capital adequacy ratio, we underwent an examination following the procedures agreed with Ernst & Young ShinNihon LLC, on the basis of "Treatment in implementing examination by agreed-upon procedures for calculating capital adequacy ratio" (Industry Committee Practical Guideline No. 30 of the Japanese Institute of Certified Public Accountants). Note that this is not a part of the accounting audit performed on our consolidated financial statements. This consists of an examination under agreed-upon procedures performed by Ernst & Young ShinNihon LLC on a portion of the internal control structure concerning the calculation of the capital adequacy ratio and a report of the results to us. As such, they do not represent an opinion regarding the capital adequacy ratio itself nor the internal controls related to the calculation of the capital adequacy ratio.

Total required capital (consolidated)	n.a.	4,869.2	n.a.	4,984.7
<u> </u>				

Notes:

- 1. EAD: Exposure at default.
- 2. PD: Probability of default.
- 3. LGD: Loss given default.

Securitizations

7.

- 4. Required capital: For credit risk, the sum of (i) 8% of credit risk-weighted assets, (ii) expected losses and (iii) deductions from capital. For market risk, the market risk equivalent amount. For operational risk, the operational risk equivalent amount.
- 5. Total required capital (consolidated): 8% of the denominator of the capital adequacy ratio.
- 6. The major exposures included in each portfolio classification of internal ratings-based approach are as follows:

Corporate (except specialized lending)	Credits to corporations and sole proprietors (excluding credits to retail customers)
Corporate (specialized lending)	Credits which limit interest and principal repayment sources to cash flow derived from specific real estate, chattel, businesses, etc, including real estate non-recourse loan, ship finance and project finance, etc.
Sovereign	Credits to central governments, central banks and local governmental entities
Bank	Credits to banks and securities companies, etc.
Retail	Housing loans (residential mortgage), credit card loans (qualifying revolving retail loan) and other individual consumer loans and loans to business enterprises with total credit amount of less than ¥100 million, etc. (other retail).
Equities	Capital stock, preferred securities, perpetual subordinated debt, etc. (excluding trading assets)
	Either the PD/LGD approach or the market-based approach is applied to equities following the termination of the transitional measurement.
Regarded-method exposure	Investment trusts and funds, etc.
Purchase receivables	Receivables purchased from third parties excluding securities (excluding securitizations)

EAD calculated using the standardized approach for credit risk represents the amount before the deduction of specific reserve

Transactions in the form of "non-recourse" and having a "senior/subordinated

structure," etc. (excluding specialized lending).

■ Credit risk

(4) Credit risk exposure, etc.

We exclude regarded-method exposure and securitization exposure from the amount of credit risk exposure.

The outstanding balance is based on exposure at default.

No significant difference exists between period-end credit risk position and the average credit risk position during the twelve months ended September 30, 2014 and 2015.

• Status of credit risk exposure

Notes:

- 1. The above table represents the breakdown of losses on write-offs of loans recorded in our consolidated statement of income after excluding the amounts associated with regarded-method exposure and securitization exposure.
- 2. Exempt portion represents the amount calculated using the standardized approach for business units and asset classes that are immaterial for purposes of calculating credit risk-weighted assets.
- 3. "Other industries" include overseas and non-Japanese resident portions.

• Status of exposure to which the standardized approach is applied

- 1. Investment grade zone includes obligor ratings A1 through B2, non-investment grade zone includes C1 through E2 (excluding E2R), and default includes E2R through H1.
- 2. "Corporate" does not include specialized lending exposure under supervisory slotting criteria.
- 3. Each asset class includes purchased receivables.
- 4. The commitments that can be terminated at any time without condition or terminated automatically are not included in the amount of undrawn commitments and weighted average of credit conversion factor.
- 5. Regarding equity exposure under the PD/LGD approach, we recognized the risk-weighted assets by multiplying 1,250% by the expected loss ("EL").

(Reference) Obligor ratings

Obligor ratings (major category)	Definition of ratings	Classification
A1-A3	Obligors whose certainty of debt fulfillment is very high, hence their level of credit risk is excellent.	
B1–B2	Obligors whose certainty of debt fulfillment poses no problems for the foreseeable future, hence their level of credit risk is sufficient.	Investment grade zone
C1-C3	Obligors whose certainty of debt fulfillment and their level of credit risk pose no problems for the foreseeable future.	
D1-D3	Obligors whose current certainty of debt fulfillment poses no problems, however, their resistance to future changes in business environment is low.	Non-investment grade zone
E1	Obligors who require close watching going forward because there are problems with their borrowing conditions, such as reduced or suspended	
E2	interest payments, problems with fulfillment such as de facto postponements	
R*	of principal or interest payments, or problems with their financial positions as a result of their poor or unstable business conditions.	
F1	Obligors who are not yet bankrupt but are in financial difficulties and are deemed to be very likely to go bankrupt in the future because they are finding it difficult to make progress in implementing their management improvement plans (including obligors who are receiving ongoing support from financial institutions).	Default
G1	Obligors who have not yet gone legally or formally bankrupt but who are substantially bankrupt because they are in serious financial difficulties and are not deemed to be capable of restructuring.	
H1	Obligors who have already gone bankrupt, from both a legal and/or formal perspective.	

^{*} Obligors who have loans in need of monitoring (restructured loans and loans past due for three months or more) out of the obligors who require close watching going forward

(O) Actual losses by asset class

	For the period from October 1, 2013 through September 30, 2014 Actual losses	(Billions of yen) For the period from October 1, 2014 through September 30, 2015 Actual losses
Corporate	(35.6)	180.1
Sovereign	(13.4)	0.0
Bank	(1.6)	(0.2)
Residential mortgage	(4.6)	(2.8)
Qualifying revolving loan (retail)	0.0	2.5
Other retail	0.1	5.5
Total	(55.2)	185.2

Note:

Actual losses are the sum of the net increase (decrease) in the amount of partial direct write-offs, specific reserve for possible losses on loans and general reserve for possible losses on loans (for claims against special attention obligors or below), etc., as well as tax-qualified direct write-offs, losses from sales of non-performing loans, losses from debt forgiveness and losses from debt-equity swaps during the relevant period. Equity exposure under the PD/LGD approach is not included in the amount of actual losses.

<Analysis>

Actual losses of ¥185.2 billion in the period from October 1, 2014 through September 30, 2015 increased by ¥240.4 billion compared with the period from October 1, 2013 through September 30, 2014. This was due to significant increase in losses from corporate exposure.

Total	865.8	287.2	(55.2)	669.4	253.3	185.2

- Estimated losses after deduction of reserves are the amount after deductions of partial direct write-offs, specific reserves for
 possible losses on loans and general reserves for possible losses on loans (for claims against special attention obligors or
 below), etc., as of the beginning of each period. Equity exposure under the PD/LGD approach is not included in the amount of
 estimated losses.
- 2. Actual losses are the sum of the net increase (decrease) in the amount of partial direct write-offs, specific reserves for possible losses on loans and general reserves for possible losses on loans (for claims against special attention obligors or below), etc., as well as tax-qualified direct write-offs, losses from sales of non-performing loans, losses from debt forgiveness and losses from debt-equity swaps during the relevant period. Equity exposure under the PD/LGD approach is not included in the amount of actual losses.

■ Methods for credit risk mitigation

(5) Credit risk mitigation by portfolio classification

The amounts of exposure to which the method of credit risk mitigation through collateral and guarantees is applied are as follows:

				(B	illions of yen)
		As of September 30, 2014			
	Financial	Other		Credit	
	<u>collateral</u>	<u>collateral</u>	Guarantees	derivatives	Total

Notes:

- 1. Items that refer to "during the six-month period" show amounts accumulated during the six months ended September 30, 2014 and 2015.
- 2. "Amount of underlying assets" and "Losses during the six-month period" include those related to, in addition to exposure originated by us, exposure to assets originated by other financial institutions if they are contained in the same securitization program.
- 3. "Default exposure" and "Losses during the six-month period" with respect to synthetic securitization transactions are based on the definition of default as set forth in the respective transactions.
- 4. Classification based on type of underlying assets is conducted according to the principal underlying asset type for each transaction.
- 5. "Credit cards" include shopping credit receivables, card loans, etc.
- 6. The effects of risk mitigation, in the context of calculating capital adequacy ratio, of transfers (hedges) of risk through synthetic securitization transactions are reflected in "Required capital" of "(B) Information of securitization exposure retained or purchased."
- 7. Of the securitization exposure retained or purchased whose risk has been transferred (hedged) through securitization schemes, we have categorized securitization exposure as investor if the risk transfer (hedge) effects are not reflected in the calculation of capital adequacy ratio, following the definition for classification of securitization exposure set forth in the FSA Notice No. 20, etc.

- 1. Items that refer to "during the six-month period" show amounts accumulated during the six months ended September 30, 2014 and 2015.
- 2. Securitization exposure that is acquired in securitization of customer's claims other than as sponsor (in the form of asset-backed securities, trust beneficiary rights and other transferable instruments) is categorized as securitization exposure as investor.
- 3. The amount of default exposure is the amount of the underlying assets recognized as default in the calculation of capital adequacy ratio.
- 4. Estimated loss amount related to underlying assets is based on the amount of the underlying assets as of the relevant date and the following parameters that are used in the calculation of capital adequacy ratio:
 - parameters used in the calculation of required capital for an underlying asset when applying the supervisory formula (e.g., PD); and
 - with respect to underlying assets classified as securitization exposure, the conservative application of risk weights used in the ratings-based approach.
- 5. Classification based on type of underlying assets is conducted according to the principal underlying asset type for each transaction. Transactions that are difficult to classify are included under "Others."
- 6. "Credit cards" include shopping credit receivables, card loans, etc.

- 1. Subordinated contributions for managed collateralized loan obligations ("CLO"), etc., are included in the above table as exposure as investor even when the assets underlying those CLOs, etc., include exposures that were originated by us. Our subordinated contributions for those managed CLOs, etc. (a risk weight of 1,250% was applied for the purpose of capital adequacy ratio calculation), were ¥0.8 billion as of September 30, 2014 and none as of September 30, 2015.
- 2. Classification based on type of underlying assets is conducted according to the principal underlying asset type for each transaction. Transactions that are difficult to classify are included under "Others."
- 3. "Credit cards" include shopping credit receivables, card loans, etc.
- 4. The classification of transactions of which the underlying assets are overseas assets is conducted according to the principal underlying assets of each transaction.
- 5. Securitization exposure retained or purchased whose risk transfer (hedge) effects are reflected in the calculation of capital adequacy ratio is categorized as securitization exposure as originator.
- 6. "Exposure on resecuritizations" as of both September 30, 2014 and 2015 are classified following Article 1, Paragraph 2-2 of the FSA Notice No. 20 (hereinafter the same).

■ Market risk

• Trading activities

The following table shows VaR (Value at Risk) figures of our trading activities:

			(Billions of yen)
	For the six months ended September 30, 2014	For the fiscal year ended March 31, 2015	For the six months ended September 30, 2015
End of period	3.3	6.5	2.6
Maximum	6.8	7.1	4.4
Minimum	3.1	3.1	1.8
Average	4.1	4.4	2.5
The number of cases where assumptive			
losses exceeded VaR during the			
period	0	2	3

Notes:

- 1. Amount of market risk (VaR) is calculated based on the internal model.
- 2. The multiplication factor for the calculation of market risk equivalent is determined by the number of cases where assumptive losses exceeded VaR before 250 business days prior to the end of period.
- 3. Our group companies which conduct trading activities are Mizuho Bank, Mizuho Trust & Banking and Mizuho Securities, etc.

VaR method:

Linear risk: variance co-variance model
Non-linear risk: Monte-Carlo simulation

VaR Simple aggregation of linear risk and non-linear risk

Quantitative standard: 1. confidence interval: one-tailed 99.0%;

2. holding period: 1 day; and

3. historical observation period of one year (265 business days)

VaR (Value at Risk)

The VaR method measures the maximum possible loss that could be incurred due to market movements within a certain time period (or holding period) and degree of probability (or confidence interval).

Back testing

The Back testing is one of the methods to evaluate the effectiveness of market risk measurements calculated using the VaR method that compares VaR and amount of losses (we compare VaR with assumptive profits and losses). The number of cases where assumptive losses exceeded VaR is the number of times in which losses exceeded VaR during the corresponding period.

The following table shows stressed VaR figures of our trading activities:

			(Billions of yen)
	For the six months ended September 30, 2014	For the fiscal year ended March 31, 2015	For the six months ended September 30, 2015
End of period	11.3	20.2	5.2
Maximum	16.3	24.8	12.5
Minimum	8.5	8.5	3.4
Average	11.5	13.2	6.4

Stressed VaR method:

Linear risk: variance co-variance model Non-linear risk: Monte-Carlo simulation

Stressed VaR Simple aggregation of linear risk and non-linear risk

Quantitative standard: 1. confidence interval: one-tailed 99.0%;

2. holding period: 1 day; and

3. historical observation period of one year of significant financial stress (265 business days)

Stressed VaR

The stressed VaR measurement is based on a continuous 12-month period of significant financial stress.

• Outlier criteria

The following table shows results of calculations under the outlier framework:

			(Billions of yen)
	Amount of loss	Broadly-defined capital	Loss ratio to capital
As of September 30, 2014	448.1	9,167.5	4.8%
As of March 31, 2015	529.2	9,508.4	5.5%
As of September 30, 2015	542.3	9,596.1	5.6%
Effect of yen interest rate	77.3	n.a.	n.a.
Effect of dollar interest rate	356.2	n.a.	n.a.
Effect of euro interest rate	76.6	n.a.	n.a.

Outlier criteria

As part of the capital adequacy requirements under Basel III, the losses arising from a banking book in hypothetical interest rate shock scenarios under certain stress conditions are calculated and compared with the sum of Tier 1 and Tier 2 capital. If the interest rate risk of the banking book leads to an economic value decline of more than 20% of the sum of Tier 1 and Tier 2 capital, we will be deemed an "outlier" and may be required to reduce the banking book risk or adopt other responses.

Interest rate shock scenario under stress conditions in outlier criteria

For the interest rate shock scenario used in connection with the calculations under the outlier framework, we generate annual rate fluctuation data for five years derived from daily raw historical interest rate data of the past six years and then apply the actual fluctuation data at a 99.0% confidence level to the shock scenario.

- **■** Equity exposure in banking book

■ Liquidity Coverage Ratio

Liquidity standards agreed upon by the Basel Committee on Banking Supervision require our liquidity coverage ratio to surpass the minimum standard starting March 31, 2015.

We calculate our consolidated liquidity coverage ratio (the "Consolidated LCR") in accordance with the regulation "The Evaluation Criterion on the Sound Management of Liquidity Risk Defined, Based on Banking Law Article 52-25, as One of Criteria for Bank Holding Companies to Evaluate the Soundness of Their Management and the Ones of Their Subsidiaries and Others, which is also One of Evaluation Criteria on the Soundness of the Banks' Management" (the FSA Notice No. 62 of 2014 (the "Notice No. 62")).

The information disclosed herein is in accordance with "Matters Separately Prescribed by the Commissioner of the Financial Services Agency Regarding Status of Sound Management of Liquidity Risk, etc. pursuant to Article 19-2, Paragraph 1, Item 5, Sub-item (e), etc. of the Ordinance for Enforcement of the Banking Law (Ministry of Finance Ordinance No. 7 of 2015)" (the FSA Notice No. 7 of 2015).

The status of our sound management of liquidity risk is as follows:

(In million yen, the number of d

Notes:

- 1. Item from 1 to 23 are quarterly average using data points as shown in item 24.
- 2. We do not apply the "exception regarding qualifying operational deposits" in Article 28 of the Notice No. 62 with respect to item 6.
- 3. The numbers in item 11 include the amount of additional collateral required due to market valuation changes on derivative transactions estimated by the "historical look-back approach" instead of "scenario approach" in Article 37 of the Notice No. 62.
- 4. There are no material components that necessitate detailed explanation of "cash outflows from other contracts" in Article 59 of the Notice No. 62 within item 14, "cash outflows from other contingent funding obligations" in Article 52 of the Notice No. 62 within item 15, "cash inflows from other contracts" in Article 72 of the Notice No. 62 within item 19.

Our Consolidated LCR is 124.6% for the three months ended June 30, 2015 and 128.4% for the three months ended September 30, 2015, with no significant change.

Our Consolidated LCR does not lead to any issues since it surpasses not only the current minimum standard (60%) required under the liquidity regulation, but also the final regulatory standard (100%), for the three months ended June 30, 2015 and September 30, 2015, respectively. Our Consolidated LCR disclosed herein does not differ much from the level we expected beforehand, and we do not expect our Consolidated LCR in the future to deviate significantly from the current level.

There are no significant changes in the composition, such as currency composition or type composition, and geographic distribution of the HQLA allowed to be included in the calculation.

In addition, there is no significant currency mismatch which might affect our funding conditions between total amount of the HQLA allowed to be included in the calculation and net cash outflow regarding significant currencies.
